

Are you a student in Information Technology, Software Engineering, System Administration or related course, looking for a challenging internship? Dysel is looking for young and fresh talent to complete a:

# Software Engineering Internship

## **This is what we do at Dysel**

We help organizations that purchase, sell, rent, lease and service machines and equipment. We do so by optimizing their business processes and with the deployment of industry-specific and innovative software solutions, like our Microsoft Dynamics 365 Business Central based ERP system, our own mobile (field) service application and solutions for graphical dispatching and Business Intelligence. Our main office is in Hengelo, but we serve customers all over the world.

## **This is your internship**

We want you to develop the new Dysel Sales App! You don't need to start from scratch, because we have a toolbox available to you, with which we already developed our Dysel Service App. You will use this toolbox to develop an App that can be used by salespersons of our customers. With the Dysel Sales App, they can view information about customers and equipment, create quotes and close deals. All in direct communication with the back office. At Dysel, we provide you the guidance, structure and tools to complete this assignment. We expect a proactive and motivated attitude from you!

## **This is what we expect from you**

- ✓ You are in the final phase of your bachelor or master degree in IT, Software Engineering, System Administration or related course;
- ✓ You are full-time available for a period of 5 months and able to travel to our office in Hengelo;
- ✓ You have a passion for business software and software engineering;
- ✓ You are eager to learn and motivated to deliver excellent results;
- ✓ You recognize yourself in Dysel's core values: Progressive, Accountable, Empathetic, Durable and One.

Once you start at Dysel, you will receive all the support and guidance you need to turn your graduation assignment into a success. We will transfer our knowledge about business software and engineering to you, which provides you a great kickstart of your career in IT.

**This is why Dysel is the perfect place for you**

- ✓ Excellent primary and secondary conditions.
- ✓ Coaching and training from experienced colleagues.
- ✓ A great teamspirit in which bringing in your own ideas is supported.
- ✓ Excellent opportunities for you to grow in the direction that fits your interests and capabilities.

**Curious?**
